Observations and Conclusions
Some observations on the construction industry evaluations are:
- The students scored the highest in ability to work with all types of people, ability to think and reason logically, computer literacy, and ethical standards. The area that needs the most improvement is the ability to make sound economic decisions.

Additional Industry Feedback

- Time. The student needs time on the job. He is given more responsibility as he continues to show he can handle his workload and current assignments. The more time he spends with us the more he learns and grows into new responsibilities.

-
